

DKverse README and Notice Template

Version 1.0 - June 25, 2026

Draft for business discussion only. This document is not legal advice and should be reviewed by qualified counsel before use.

Suggested README Notice

The following text may be adapted into README.md, NOTICE.md or docs/commercial-use.md.

DKverse is a public source-available project created to allow developers and founders to study, test, fork, improve and potentially continue a digital ecosystem for collectible cards. The project may include portfolio tools, marketplace concepts, authentication flows, social features and related infrastructure ideas.

This repository is public for transparency, collaboration and experimentation. It is not released under an open-source license such as MIT, Apache, BSD, GPL or AGPL. Commercial use is not permitted unless a separate written commercial adoption agreement is signed with Rafael Minuti.

Free permitted use

- Study the code.
- Run local tests.
- Create non-commercial prototypes.
- Submit issues, improvements and pull requests.
- Evaluate the project technical or commercial potential.

Commercial use requires written authorization

You may not operate, monetize, host, sell, sublicense, launch as a public SaaS, launch as a public marketplace, launch as a mobile app, charge users, collect transaction fees, sell services, collect advertising revenue or otherwise commercially exploit this repository or any substantial derivative without a signed commercial adoption agreement.

Standard commercial structure

For serious third-party operators, the intended standard structure is: 2.0% of Adjusted Annual Net Operating Profit for 10 years after commercial launch, plus a 0.50% exit fee on Net Exit Proceeds if the DKverse-based business is sold during that 10-year period. No payment is expected before commercial launch or before the business exceeds the agreed revenue threshold.

No operational responsibility of the creator

Any third party that operates a DKverse-based business is solely responsible for users, payments, taxes, disputes, privacy, data protection, cybersecurity, consumer protection, regulatory compliance, fraud prevention, content moderation, card authenticity, marketplace rules and all business operations. Rafael Minuti does not operate, manage, supervise, endorse or guarantee any third-party implementation.

Brand notice

The names DKverse, DKvault, DKmarket, DKarena, DKchat and related logos, marks, visual identity and brand assets are reserved. Commercial brand use requires separate written authorization.

Contact

Commercial adoption proposals may be sent to: [INSERT CONTACT EMAIL].
